```
// define initial conditions (players, each player's sound types,
etc.)
var array.player[0,...,n];
var array.soundType[0,...,4];
var array.duration[];
var perfLen = random;
// each player runs their part
part() {
    var player = player[n];
    var sound = soundType.choose;
    var duration = duration.random;
    var play = player.sound.duration;
    pause(duration.random);
}
// conditions for piece iteration
var perfDur = n;
while perfDur < perfLen {
    part().do;
}
```
